APPLICATION FOR SYABAS TO CARRY OUT FINAL INSPECTION

We the consultant has completed the construction of the required system in accordance to the approved plans. We request SYABAS to carry out a final inspection of the water supply system and herewith we enclose the following documents:-

- a). Original approved drawing (1 set)
- b). Testing certificates (1 set)

We, the designer and supervising consultant, undertake to confirm the pipelines/reservoirs have been completed

- 1. All water supply installation works are built according to approved plans and specification.
- 2. All fittings / Product used are approved type as in approved list
- 3. Pipelines/reservoirs are not constructed in private land.
- 4. Pipelines of 700mm and above are physical cleaned internally to be free from debris and mud.
- 5. Take full responsibility for any non-compliance and deviations of the works.

Please inform us of a suitable date for inspection.
